Some notes before creating entity

Some notes before creating an entity:

- ❑ Information is unique and must be consistent across all social profiles.
- ❑ If you go to entity for many websites, you should synchronize the website and gmail into the chrome profile (1 Website/1 Gmail/1 Chrome) to avoid confusion during the entity process.

Some notes before creating an entity:

- ❑ Priority registration with Username + Pass (Register via GG is limited)
- ❑ During the registration process, you should fake your IP to avoid social death. You can use the 1.1.1.1 application.

an entity:

After registering, remember to activate your account via gmail (if available).

Some notes before creating an entity:

- Because the social entity profile is a collection of many different social networks in different countries. Therefore, during the process of going to the entity, you should combine the use of the translation feature to facilitate profile creation.
- Right click - Translate to Vietnamese.

Some notes before creating an entity:

VO VIET HOANG SEO

- Not all social entity profiles can create **usernames** . **Many social networks do not allow creating usernames** , so **just use the social's default username.**

Whatever happened to the 1,850 BOXES of Documents that Biden won't show to anybody? What about the Docs found in Chinatown, D.C., and those in his unsecured garage, where Hunter stayed at China was sending Biden millions and millions of dollars for doing absolutely "nothing?" Maybe the nothing was "for doing plenty!"
